Your submission:

Commissioner Hayne must be allowed to do his job without interference from the government or overseas money thugs. He must separate the Commercial banking from Investment banking to stop speculative trading that keeps the financial bubble afloat. Setting up a "National Bank" run by government to invest in the production of farms, industry, infrastructure and small business will bring security and prosperity to our Nation. A study of the workings of a National bank can be found by going back in our countries history and looking at what King O'Malley, Frank Anstey, Denison Miller did along with our great Prime Minister John Curtin and Ben Chifly. Let this country be what they envisaged it to be. Call for a Glass-Steagall Act and lets regulate the banks.
