Do you agree to your full name being published: Yes

Your submission:

To whom it may concern,

The royal commission should include lawyers receivers brokers FOS Apra and ASIC.

Each and all of the above sided with the bank in my case, even though all of the above found and or admitted fraud in my case.

My lawyer, said no one beats the banks.

FOS Found in my favour but did not receive transparency and honesty from [REDACTED]

[REDACTED] sent me lifelines number.

[REDACTED] didn't want to know said go to FOS.

My case is still running and staff at [REDACTED] and [REDACTED] have told lies about documents and have bullied me and threatened me.

I believe its the whole banking industry including the regulators that also work in the banks favour.

The courts are also handing down summary judgements like lollies, totally wrong !

The banks are still foreclosing and putting up peoples rates privately some I know on 9 %.

The banks need to be broken up and glass steagle put in place to protect our children against corruption.

Big salaries and commissions should be cut in half to prevent the greed

The royal commission should be extended and the terms of reference widened to include redress for victims ,especially those who have been crucified by engineered defaults by banks.

We need a massive change in this criminal behaviour by banks , there will be dire consequences if this commission is not extended I believe.

People are fed up with the disgraceful treatment from the banks.

Only a real royal commission can solve the issues and include the regulators , whom have done nothing that has stopped criminal activity.
