I veronica smith email attunedhealing.vs@gmail.com , day contact phone [REDACTED] agree that I choose to complain about the banks being broken up and seperated from collecting, investing and using peoples savings as an out for the banks and government to use in any form. The commission needs to seperate savings from all other practices and ensue they are protected from all other ttansactions or to bail out thr govt when the whole bubble of massive debt they have put the Australian country into currently crashes. the PEOPLE work hard all their lives to make a living and go without for years to save their meagre earnings and banks and government have no right to see the common mans savings as a cash cow to drag them out of speculative disaster when it finally hits this so called rich country. We all vote for people to be integral on our behalf and to run our country for the good of the people and put trust in our banks even when we get such little return or results from either- in our country policies, rights and return of speech being kept, or retutns on our money being so called invested for ev3n a small return, but those at the top eatn millions..how does that equate?. I wish to advise the Glass Seagal system be introduced in Australia and then the common man whos work, money invested or saved is protected , without the little mans hard earned dollars saved ,none of the elite, high flyers or politicians would have a job let alone the many properties and cushy wealth they all sit prettily on, when there are people on less than 50k or even 27k in full paid jobs or disabled people on less that 18k trying to save a dollar and cutting their costs on simple things such as what can be afforded to eat each week. Forget holidays, new furniture or buying a roof over your head., and even paying rent. Get the elite that vote in pairliment or the big banks and lawyers that create the systems we have to live by and ask them try and shop at savers and st vinnies for 10 years with a so called full wage coming into a houshold , even with a second weekend job it wasnt enough. The 1930's movie METROPOLIS is a current reality. The worker has no rights or say and riles are you cant even protest against it unless you do as I am and send a complaint into cyberspace where a ghost may answer or not and it can be deleted from existence with the click of a button or some other country hacked the info and it wasnt seen .. que aera sera.. veronica smith
