Your submission:

Australia need much imeadiate start to much inforstructure

for start the dambing of northed NSW

and the dambing of north queensland

these water then used to pump most of such over the mountains and other

to the inland and run into Australia's center or such

money also needed to build coal fired power mostly in areas near or at coal mines

ALL above will need to be done with public money achieve by

national the banks and feature keep feature assets in state control
