Your submission:

Dear Commissioner Hayne,

Keep up the important work that you are doing with regards to the banking royal commission and you can hold your head high.

I urge you to break up the banks because it will solve many systemic problems due to the conflict of interest inherent in the vertically integrated system. Breaking them into commercial or investment banks is a win-win for the banks, bankers, investors, mortgage holders and savers too! We need a safe banking system that serves the people. Morality must prevail over genocide. No more should the Too Big To Fail get away with destroying lives. The long arc of history bends toward truth and without that being upheld human civilisation is at stake. We are at a cross roads of history and Australia is leading the world on structural reform of the banks! Beautiful.

I also urge you to hear testimony from an expert, Dr Wilson Sy, a former APRA Principal Researcher who is qualified to know the corruption and I'm sure wold also advise structural separation of the banks.

Kind regards,

Jan Pukallus
