Submission for: My Self

Name of other person, business or organisation:

Do you agree to your submission being published: Yes

Do you agree to your full name being published: Yes

Your submission:

This entire fiasco of a royal commission is beginning to annoy. You know what the problems are as we all do.

Destroy all bogus banks and restore the constitutional bank now (which is your duty).

All commercial banks produce absolutely nothing at all but choking debt for us with super excessive profits for themselves and most of this profit is taken away overseas.

You need to unclatch this banking monster from all aspects of money supply permanently.

Stop this useless dialogue and advise them that this is how it is going to be from now on - it should never, never have been allowed in the first place.

For an immediate response, urgently restore the Glass-Steagal separation NOW this instant to prevent the bank grubs from manouvering any more. We must not cover ANY of their losses at all-ever.

We have had more than enough talk. We should see a massive amount of convictions very soon. Just apologising is nothing.

Then usher in the constitutional bank system - the only bank which you are legally able to provide us.

Let us show the world that it can be done!! Now is the time
