Email: [REDACTED]

Phone Number: [REDACTED]

Submission for: My Self

Name of other person, business or organisation:

Do you agree to your submission being published: Yes

Do you agree to your full name being published: Yes

Your submission:

That the banks have show themselves to be untrustworthy and predatory in nature.

That investment banking must be separated by law from savings accounts.

That the 3 years before a bank account can be swiped is theft.

That the banks are run by human beings who are benefitting financially from the current scandalous arrangements to the detriment of the populace as a whole.

That the banks require strict regulation & further strict oversight from a public service geared towards ensuring the strictest oversight which the reserve bank board APRA & numerous other alleged financial 'regulators' have all been living high on the hog as opposed to doing their duty as exposed by the RC & must be held personally responsible for their actions which have caused grave harm to others.

That the punishment for these financial institutions entrusted with our savings must be befitting the crime & weighed against the \$6.75 theft of a packet of tampons & the \$500 fine it generated

That the banks are selling debt to their own entities or those in which they have an interest for cents in the dollar then pursuing those funds in full & further adding twice to the credit ratings agencies via their main business & their debt collecting entity. this is odious debt & contributing to a false economy.

That MOUs between entities engaged in holding the savings funds of the general populace be legislated as unlawful & unenforceable under law.
