Your submission:

Dear Commissioner Kenneth Hayne,

Congratulations for your hard work. Your inquiry has shown that banks are clearly guilty of misconduct and corrupt practices. There are thousands of Australian victims. The best ways to prevent these practices from occurring in future is to break up the banks. There is already a bill in the parliament to break up the banks which was tabled by Bob Katter on 25th June 2018. It is a sheer necessity to implement such a measure in order to protect our economy and our people.

In order to empower your final recommendations, it is worthwhile to call on some experts in the banking industry who have been calling for the need to break up the banks such as Dr Wilson Sy - former director of research at APRA and John Dahlsen - former director of ANZ bank to testify to your RC.

I trust you will finish your work by showing true leadership and courage to protect this nation and hence a historical figure.

Kind regards

Jeanette & Ivan Staehr
