Submission for: My Self

Name of other person, business or organisation:

Do you agree to your submission being published: Yes

Do you agree to your full name being published: Yes

Your submission:

I respond to the interim report of Justice Haynes.

Justice Haynes states insidious greed by the banks it also is now common knowledge that the FSP's have drastically failed to be compliant to Applicable Industry Codes. Have taken it upon themselves to wipe out peoples dreams, hopes and aspirations. The majority of the persons are Sole traders and corner stone of Industry that makes up the back bone of the financial sector across the states and territory of Australia our land our Country. I ask why or what for.

On these grounds I do not think it would be hard to come to conclusion when the appropriate Industry Codes Acts and Legislations have been deliberately ignored. The so called copper fat cat /Regulators have sat on their hands and allowed this to occur. Where is the accountability now. If we exceed a 60 kilometre speed limit we incur the Wrath of the Law. The FSP have not once but has been open slather in a holocaust of financial murder upon families and individuals due to systemic noncompliance.

I am now to the understanding that the interim report is the Grand Finale of The Royal Commission with no follow up. However has the support and permission from the Prime Minister of Australia and labour Government to extend the Royal Commission to bring the matters to a head an allow natural justice to prevail an put financial compensation back into the pockets of thousands who made up employment and sustained the livelihood of towns where bankers and cartels would not dare sleep. This could also be some sort of financial stimulus to help regenerate and restart peoples lives and hopes.

Given my experience if this is such the case you sleep well then Justice Haynes and while you are tea totelling with your cronies of the white collar world and that big under the table bonus you will get to protect the fat cats that you will probably never spend as you are to old, while people sleep in the streets, caravans an derelict places and Women children and men whom have been stripped of their demeanour are exposed to Domestic Violence due to the pressures of what has occurred that then leads to Crime just to live, That once again the Tax payer has to pick up and mop up the mess.

Thank you for nothing other then again lining your own pockets and interests of your white collar mates. I respectfully remind you Justice Haynes if Directors incur more then a 3 month jail term with actions undertaken by them they cannot no longer be Directors of boards. Its not that hard I feel.

Given the Tax payers money that has gone into running the Royal Commission and in particular what has come out of the Commission cannot you substantiate to extend the Royal Commission. I myself had [REDACTED] on the ropes Justice Haynes. On the 27th March 2018 I borrowed monies and paid a Solicitor to give me an advice on the matter. Under section 61 of The constitution it was conclusive I had claims greater then the Bank itself. My legal representation [REDACTED] failed to supply me that advice prior to the filing date of 20<sup>th</sup> June 2018 stated by the Court of Appeal Registry. I received it on the 21<sup>st</sup> June 2018. My matter was struck out by the Court of Appeal. I am a self presented litigant and 18 years of my life vanished before my eyes without nothing to show. I am now 53 years of age and renting. Thank you Justice Haynes you champion.

Justice Haynes feel free to contact me
