Your submission:

Dear Sir

I am very young and worried about my future especially with what is been revealed in your inquiry this year.

Most people, and especially those without a great deal of experience in dealing with financial resources, are uneducated

about the financial world.

Everyday Australians need your help to protect them from investing in the wrong, riskier products as shown in your finding.

Why not demand in your capacity as a commissioner responsible for finding the truth on the banks practices to include a real solution for your finding, we need a legislation to do this.

Looking forward for true solution so i have a real future.

Thanks
