

Submission to interim report.

My ideas are the following

- a) Substantial fining of banks ie Millions of dollars for cheating on loans by deception.
- b) Federal Police to review cases of cattle duffing and breaking of state laws by banks.
- c) Laws that prevent bank employees from getting bonuses for obtaining a customer business.
- d) Banks to repay overcharged interest, by deception or altering loan terms unilaterally, plus compound interest on this amount for the number of years that it has been since original loan was taken out. This should also be accompanied with an apology in the major press newspapers for all the damage, heart ache and stress they have caused.
- e) Some sort of redress from previous politicians over the years that have been advised of these crimes by banks but would not help individuals or take any action against these institutions. I have copies of numerous letters to politicians about the criminal behaviour by the [REDACTED] and the [REDACTED] banks. May be a public apology by the Prime Minister
