this is about [REDACTED] misleading marketing conduct Do not insure with these criminals. They call my number over 30 times a day & i have kept every log because if it keeps happening my lawyer says i can sue them for harassment and i have the evidence. Why would i give these [REDACTED] my good money after this treatment. I have never signed up for these to call me and i don't want their calls. I shouldn't have to private message them either to stop them calling me. Stop calling when you're asked on the phone. As a result of this i have been telling everyone i know (and alot i dont know) to NOT invest 1 single cent with these unprofessional rude. Only an idiot would give in to your annoying calls and invest with you. Most insurers will beat your [REDACTED] prices to get your business and if you already have car/home/other insurance you could already be eligible for a hefty discount from them. Do not invest with these guys. Its just not worth them having your details. I've been getting these annoying calls for almost a year and I'm not a customer. I shudder to think how they would be treating you once they have ALL your details, or your family and friends. If there's a Dodgy Brothers Insurance id choose them before these shoddy bad bad people. This is a legitimate warning based on almost 1 year of calls and my own research into [REDACTED] so it has merit. [REDACTED] stop calling PEOPLE TO SAY THEY WON 1 YEARS FREE INSURANCE , I AM SICK OF IT
