Do you agree to your full name being published: Yes

Your submission:

I had an accident over 4years ago 2014 and still am no closer to having the injury even recognised even today 19.09.2018. In 2014 was cleared by [REDACTED] to go back to work I was all ok but still had a sore side in the end after continual nagging pain 16.03.16. my wife sent me of to see a private doctor who sent me for a CT scan and found an old laceration of my liver went to [REDACTED] with the info they put me through to a specialist tribunal their response was 0% injury. Couldn't believe it so read report found that it didn't have the CT in question even mention in it they never even ruled on it because [REDACTED] didn't submit it into the papers to the tribunal. Went back to them this was ridiculous but all complaints fell on deaf ears. Went to leader of opposition Deb Frecklington's put a complaint into Premier she said she'd look into it. Asked for all papers from [REDACTED] found papers given by mistake to me marked Confidential in them was comments between [REDACTED] and [REDACTED] directly conspiring against my claim (on their own letterheads) supporting each other whilst both parties picked through my claim documents also found office slander (running me down) in the very draft of my letter of decision that my claim was denied in by Workcover Geeeeeze.....Sent all copies back to Premier she had Mr Nibbs look into it he sent me to ombudsmen office they did not want to deal with it so went to his second suggestion 3 days ago , Fair work Commission they laughed at my claim said get Lawyer but all parties know I'm now broke with this after 4 year fight no one else to turn to and they all no it. Must say though with whole process everything is on email paper trail can send it through to you but it is a bit No legal council will touch me because my claim is to far down the track to make money out of all doctors paid off radiologists to scared to go against Workcover they are far to powerful they have everything stiched up but I bet they would be very alarmed if you rang them because all my paper work totally condemns their whole Scam of NOT paying out genuine claimants it's a real rort.....they are all in on it as most of them are lawyers I know this sounds paranoid BUT at least give it some justice and just read some of my emails please Regards Shane Chellis. P.s . Email me and I will send most relevant documents through I am not a nut this is all quite true Regards. Email is best I check it regularly if you are going to do anything look into this absolute rort as they are all protecting each other at my claims expense..
