Your submission:

Please do not allow the banking system to go unchecked and use the superfunds money reserves as their own personal play money to gamble as they please without safe guards. We need the glass-steagall system of control over the banking system. Please understand that the banking system has proven themselves to be criminal organizations and cannot be allowed to continue as they presently function. The world financial crisis is the manifestation of a corrupt banking system. It is time to break up the banks control structure and get back to protecting the people and their savings.
