SUBMISSION FROM SHAWNA WARNE I believe that a Glass Steagal Structural Separation of the Banks must be implemented to protect the future of Australian Super Funds and the Australian Banking System. At present their is a Bill before parliament submitted by Bob Katter (Banking System Reform Bill 2018) which would protect Super Funds from Bank rorting and also make all Banks less like casinos and safe guard Australian depositors from a collapsing financial system. I would urge the Commission to investigate the Glass Steagal Structural Separation of the Banks Bill as a solution to the present problems in the banking sector.
