Your submission:

To the Royal Commissioner, I am gravely concerned that the Australian Banks have become so dishonest and that their 'Criminality' has now become their operational normality. So in this environment the general confidence has been shaken and it almost seems that they believe that they are untouchable. Especially in light of the comments made by past and present Australian prime ministers. Therefore making the Australian Government involved in their wrong doing and even covering their wrong doing by placing a goat as the guard over the carrot patch. The Government watchdog that is. Therefore much more rigid legal restrictions must be put in place. And by that I mean, Glass-Steagall structural separation of banks which would stop banks from owning, and therefore looting, super funds, and the Banking System Reform (Separation of Banks) A legal Bill 2018 has already been tabled in Parliament to make this happen. And I greatly believe that this is something that must be enacted into Australian Law ASAP. So as to stop the stunning scale of the banks' looting of superannuation, I can clearly see a great trouble coming upon all Australian to totally enslave them. And crippling them. So Mr Commissioner, we look unto you for our only hope at this time to stop this 'Cabal' of evil banks . Please hear our cries, and fight on our behave. "Only Bob Katter's Separation of Banks bill will stop the banks from looting your superannuation". Signed a 7th generation son of Australia, Ian Brander
