[REDACTED]

I just wanted to let you know that we will be landing in Brisbane the morning of March 17th.

We will have to purchase some sort of transportation. We are thinking of a dual cab ute at the moment until we get ourselves more organized. This vehicle will then be the farm Ute.

Also, we will have to meet with you and organize something to get us up and running by the end of March. I think that I told you already but the lease on Kia-Ora is ending on 31 March and Simmons are vacating. They originally told us they would like it for five years, but since all of the weather dramas, they are unable to keep everything stocked and turning over properly. That makes leasing Kia-Ora for another two years unviable for them. We are concerned about what we are going to do, but know that it will all work our the way it is supposed to.

With only a few weeks left in the USA, we are working at getting the things that we need done and get a few things cheaper for the working side of things.

I don't know if we will stop on our way home in Dalby or go straight to Kia-Ora. I will let you know as soon as I can get a method of communication sorted once we arrive home. We are looking forward to sleeping in our own house again. The kids are starting to get excited about seeing their friends as well as going back to the old school.

*We will be seeing you soon.,
Wendy and Adrian*

*Essential Oils. Check them out at—
